## Junior web devloper

---

Hello to my CV I am a fresh graduate from the IT department specialized in full stack web development I hope you give me a chance to prove myself

## About me

---

I have great ambition in this field and I hope to find a place where I can develop myself, especially since I am a new graduate and I have great enthusiasm.

## Education

---

**University**, Middle Technical University  
• **Information Technology Department**

Sept. 2020 to May 2024

## Projects

---

### Whatsapp clone

2004

- I designed a simple WhatsApp.clone that sends and receives data as a conversation between two people. I used the Mern Stack technique. using node. js and react library and express js with mongo db
- Used Node.js and React.js and MongoDB.

### hospital website

2003 to 2004

- I created a medical hospital website for my graduation research and it got a very good grade.
- Used Django, SQL, and javaScript.

### Book Store

2002

- I have designed a website for selling books with login and account creation. I built it full stack using only NextJS.
- Used Next.js.

## Technologies

---

**Languages:** html and css and javaScript, bootstrap,React.js with Next.js, Node.js with Express.js, SQL,MongoDB,Django  
And GraphQL And RestApi

## My GitHub

---

**My gitHub:** I have done many projects with these techniques and am still learning more. Please take a look at it.
